

Every supply. Every service. Delivered.

One vendor for everything an office, institution or hospital has to buy — and the one thing it is legally required to maintain.

Stationery

Gifting

Cleaning

Signage

Fire safety

Value tier to premium in every line, held across a vetted supplier base — so the specification follows your budget rather than ours.

2017

Established. Government and corporate supply since day one.

500+

Products across the five categories, value tier to premium.

24 hrs

Quote turnaround on a complete enquiry. Rush orders in 5-7 days.

3

Government portals — GeM, MahaTender and CPPP.

◆ Government

Departments and public sector units, supplied through GeM, MahaTender and CPPP since 2017.

◆ Corporate

Offices, GCCs and manufacturing sites across Pune and PCMC on fixed rate lists.

◆ Institutional

Hospitals and nursing homes, schools, colleges and hospitality.

+91 91569 60605

Five categories, one rate list.

Most offices buy these five things from five different suppliers — five rate negotiations, five sets of purchase orders, five invoice trails. We hold distribution across all of them, at a value tier and a premium tier in every line, so the specification follows your budget rather than ours.

Stationery

Pens, markers, notebooks and registers, copier paper, envelopes, sticky notes, staplers, punches and desk organisers.

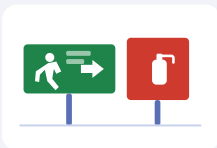

Value and premium tiers · replenished on a set cycle

Corporate gifting

Trophies, mementoes and awards, insulated flasks and drinkware, tech gifting, premium diaries, bags and welcome kits.

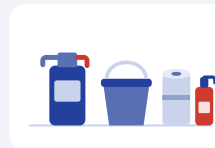

Curated to occasion, headcount and budget per box

Signage

Fire-exit and safety signage to NBC 2016, evacuation plans, directional boards, name plates and acrylic display.

Made to specification · site measured

Cleaning material

Floor and glass cleaners, disinfectants, hand wash, tissue and paper towel, refuse sacks, mops, gloves and washroom supplies.

Scheduled replenishment against a fixed rate list

THE FIFTH CATEGORY

Fire extinguishers — supply and service

ISI-marked units across all six agents — ABC dry powder, carbon dioxide, clean agent, mechanical foam, wet chemical, and water spray and jet. Installed at correct handle height, refilled annually, hydraulically tested and kept on a register that is ready whenever it is asked for.

A calendar we keep for you.

Buildings in Maharashtra file a fire-safety maintenance certificate twice a year, in January and July. Our job is to have the equipment, the placement and the paperwork already in order when the date comes round.

Who it applies to

Schedule I covers hospitals and nursing homes, business and mercantile premises, industrial buildings and educational institutions — not hospitals only.

Where we stand

The certificate is signed by a Licensed Agency. Unity is a supply and service provider, not the certifying agency. We make sure that when the agency inspects, every item it certifies is specified, placed, in date and on the register.

WHAT WE PUT IN PLACE

- Placement audit against IS 2190 before you buy a unit
- ISI-marked units supplied and installed, certificates included
- Annual refilling and hydraulic testing, tagged and dated
- A maintained register — location, type, service and test dates
- A reminder ahead of each filing month

What an inspection actually checks

Rarely the extinguisher itself — usually placement, expiry dates, the right agent for the risk, and whether the register can be produced on the day.

15 m

Travel distance

Maximum walking-route distance to the nearest unit — on the route, not the plan.

200 m²

Coverage density

At least one unit of minimum 1A rating per 200 m², and one on every floor.

1 year

Service interval

Maximum interval between professional services, with monthly gauge checks logged.

Class K

Right agent, right risk

Wet chemical at every cooking station; CO₂ or clean agent in server rooms.

What to specify where

Office floor & corridor

ABC dry powder 4 or 6 kg — paper, furnishings and electrical risk in one agent.

Server & panel room

CO₂ or clean agent — no residue, so equipment survives the response too.

Commercial kitchen

Wet chemical 6 L per cooking station — the only agent that saponifies hot oil.

Generator & fuel store

Mechanical foam 9 L — blankets the surface and prevents re-ignition.

The operating model matters more than the catalogue.

1

Site survey

We walk the floor, count area, measure real travel distances and mark gaps against IS 2190.

2

Itemised BOQ

A costed bill of quantities with the make list — free of charge, no obligation, yours to keep.

3

Rate list

Fixed rates across all five categories for the contract period. One negotiation, not five.

4

Scheduled supply

Replenishment on a set cycle so the stockroom is not managed by emergency.

5

Compliance file

Register of location, type, capacity, service and test dates — ready for the fire department.

Why Unity

- **One point of contact.** One rate list, one invoice, one person accountable.
- **Compliance owned, not just supplied.** The register, placement audit and service dates are our job.
- **Value tier to premium.** We specify to your budget, not to one product.
- **Registered and audit-ready.** Udyam MSME, GST compliant, listed on GeM and MahaTender.

Who we supply

Government departments and public sector units via GeM and MahaTender; private corporates and GCC offices across Pune; hospitals and nursing homes; schools and colleges; hospitality and manufacturing sites.

Service standard

Quotes within 24 hours of a complete enquiry. Standard delivery 21 days; rush orders in 5–7 days where stock allows. Same-week service across Pune and PCMC.
